

# Data Literacy Interest Survey Results

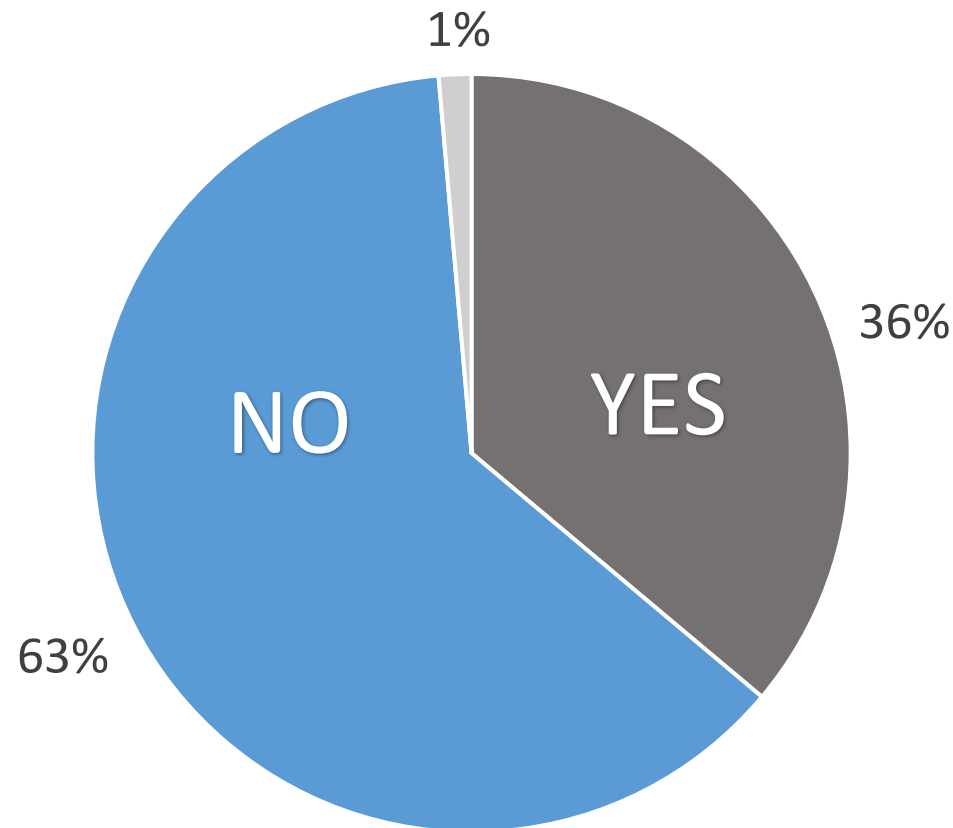

- This PowerPoint presentation on the Data Literacy Interest Survey Results was given by Nancy Shin at the 2019 PNC-MLA conference in Boise, Idaho during the NNLM Update. The data literacy survey results in this slidedeck highlight some key feedback that we received from PNR network members and non-network members.
- Data Literacy Interest survey was created and circulated by Nancy Shin and Carolyn Martin from the NNLM PNR office from September 23<sup>rd</sup> – October 4<sup>th</sup>, 2019.
- The survey's purpose was two-fold.
  - One to gain an ***better understanding of network members' awareness of data resources that are freely available to them like NNLM's "RDM 101" and "RDM 102"***.
  - Two, to also ***better understand current data literacies of our Network members*** in order to justify developing a new data literacy course.

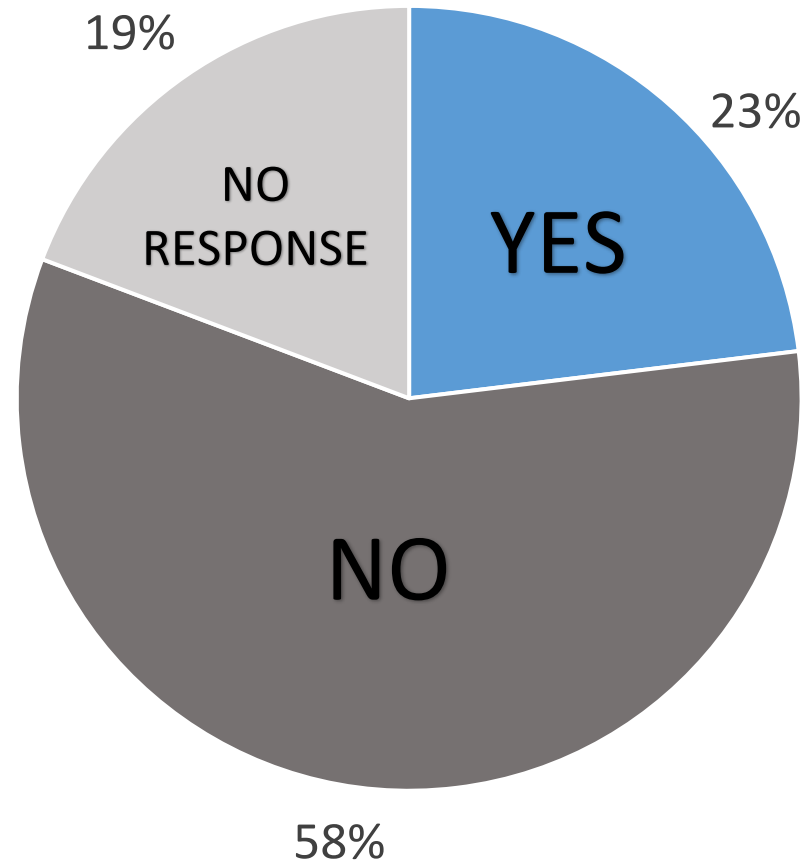

# Survey Taking Librarian Type

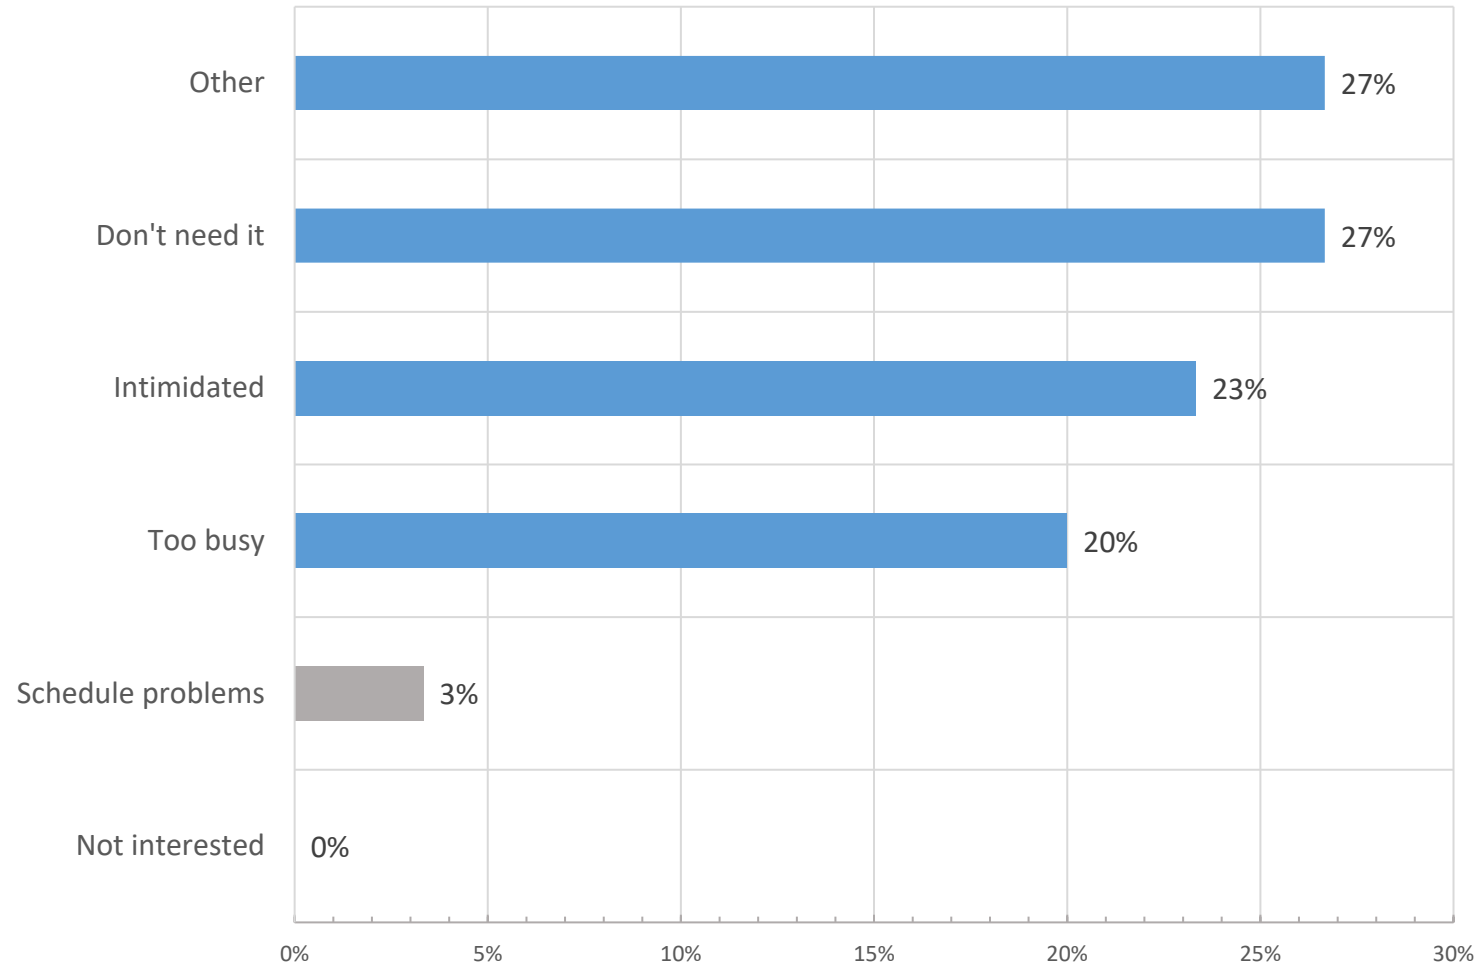

# Percentage of Survey Respondents that have Heard of NNLM's RDM Courses "RDM 101" and "RDM 102"

# Percentage of Survey Respondents that have Taken Either NNLM's RDM Course "RDM 101" or "RDM 102"

# Reasons Why Survey Respondents did not take NNLM's "RDM 101" or "RDM 102"

# Percentage of Survey Respondents Interested in the Creation of a New Data Literacy Course
